

TaskMorph AI Power (TAP) – Whitepaper

Introduction

TaskMorph AI Power (TAP) is an AI-driven freelancing ecosystem that automates project analysis, task allocation, and collaboration. Powered by SidraChain and deployed on the Solana blockchain, TAP ensures seamless task distribution, transparent payments, and smart automation across industries.

Mission & Vision

Our mission is to transform the global freelance economy using AI and blockchain. TAP envisions a world where freelancers and clients interact effortlessly, guided by intelligent automation and secured by decentralized infrastructure.

TAP Token Utility

The TAP token powers transactions, governance, staking, and reward systems within the TaskMorph ecosystem. It acts as the backbone for all platform activities, ensuring fairness, scalability, and community-driven growth.

SidraChain Integration

Through integration with SidraChain, TAP benefits from advanced scalability, cross-chain functionality, and enhanced AI data interoperability. SidraChain strengthens TAP's foundation, enabling faster, smarter, and more reliable task automation.

AI Ecosystem & Automation

TAP employs AI agents to analyze project descriptions, split them into smaller executable tasks, and match them automatically with freelancers. This reduces human friction, boosts efficiency, and guarantees high-quality results in every collaboration.

Roadmap

• Q4 2025 – Launch of TAP Token on Solana & SidraChain • Q1 2026 – Platform Beta with AI Task Automation • Q2 2026 – Global Freelance Integration • Q3 2026 – Governance & Staking Activation • 2027 – Full Ecosystem Expansion & Partnerships

Tokenomics

Total Supply: 1,000,000,000 TAP • 40% Community Rewards • 25% Development • 20% Liquidity & Exchanges • 10% Team & Advisors • 5% Marketing & Partnerships

Future Plans

TAP aims to evolve into a fully autonomous AI freelancing DAO, integrating predictive analytics, on-chain verification, and cross-industry AI tools. Our long-term goal is to redefine how digital labor operates in a decentralized world.
